(a) Decoded RocksDB edit

Same client sequence: 128

SST	Before	After
9, 11, 13	●	–
15	●	●
22	–	●

● Required by the view

(b) Projected persistence order

Arrows: durability prerequisites

For each unlink: T = before < F = after

Both edges: 140 cuts, no missing SST

Without D: old view can miss SST 9
